Subject: Associate reviewer coordination - Dewey-Burdock Final EIS

Lisa,

Please take the lead and let me know if you have questions or issues on UIC-related information, Class III injection wells and Class V disposal wells. Can you provided a URL link to the file location in the "I" drive?

Regards,

James Hanley

Subject: FYI - Coming soon - Dewey-Burdock Final EIS

Hi all,

I should be receiving disc copies of the Final Dewey-Burdock EIS next week. There is [only] a 30 day hold period between when it is published in the Fed Register by EPA (likely 2/7/2014) and when the NRC can issue the final license. Thus, a review of the Final EIS compared to the Draft EIS will need to be done quickly, especially since the Final EIS letter needs to go through regional counsel.

I think all of you saw the sections of the preliminary final EIS related to your work subject matter, as well as the NRC's draft response to EPA comments. Since I am unsure of your work loads, there are three options to approach this Final EIS:

- 1) I can look at the changes in light of comments you provided on the preliminary final and if needed, follow up with individuals on issue(s) that are not clear;
- 2) You can look at the changes in light of previous comments and let me know if you have any issues; or
- 3) A combination of the above two.

I think we know where they addressed our comments and where they have not, so unless there were big changes between the preliminary final and the final document, the review can be focused. I will put the document on the 'I drive' so it will be available to all of you.

For planning purposes, think about whether you want to conduct the review of the changes related to your particular media or whether you want me to take the lead and let you know if I have questions or issues. Either way, I will evaluate the FEIS based on the comments we have provided in past.
